

## SW619 Penetrating Catalyst

**DESCRIPTION:** NOT FOR SALE OR DISTRIBUTION IN CALIFORNIA. Features a forceful jet spray and a powerful penetrating catalyst which help provide rapid penetration through rust and corrosion to free frozen parts. Reduces friction and wear over a broad temperature range. Leaves a long-lasting lubricating film to defend against rust and corrosion. Creeps and pulls itself up, around and into cracks, crevices and threads with powerful capillary action.

**TO USE:** Saturate part to be loosened and allow product to penetrate for a moment before attempting to break free. For heavily encrusted pieces a wire brush may be used to help remove corrosion. Apply a light final spray to all parts prior to reassembly.
